PRO VIDEO COLLECTION

Designed specifically and ergonomically around the user, The Pro Video collection provides you with the perfect balance of light weight and protection.

Crafted and Perfected over a decade working with leading industry professionals, the Pro Video collection provides some of the best ergonomic comprehensive working solutions available today. State-of-the-art protective carrying and working solutions for Pro HD, ENG, EFP, HDV, DV & Mini-DV.

- Camcorder bags and backpacks
- Camera Gloves and DV/HDV Guards
- Rain Covers
- Audio Solutions
- Monitor and Editing bags
- Lighting cases and more...

Kata's extensive test team keeps in tune with industry professionals around the world to research and identify the needs of today's modern photography industry. To meet these demands, we design, develop and update our products to meet the latest technology and user requirements.

CARRYING & WORKING SOLUTIONS

PROTECTION & LIGHTWEIGHT PERFECTLY BALANCED

'Click' Interlocking Handles

Our patented CLICK handles have been designed and field-tested for sure grip and optimal comfort. The unique engineering and shape of the thermo-rubber pads ergonomically fit your hand. Just 'click' the two parts together and you are ready to go!

Shoulder Straps

④

⑤

- 1) APSS Advanced Padded Shoulder Strap (Patented), page 52
- 2) NSS Non-Slip Shoulder Strap (Patented), page 52
- 3) BSS "B" shaped shoulder strap
- 4) SPAD Thermoplastic padded shoulder strap
- 5) STRP Adjustable shoulder strap

PROTECTING SOLUTIONS >>

Laptop bags - Field production kits

DV/HDV Guard - No compromises

Backpacks - for outdoor or urban adventures

Torso Pack, Waist Pack & Rucksack - Mix and match for your perfect solution

Rain Covers - Don't let the weather stop you

DPB

Shoulder straps attach to the bag via this rugged yet light weight buckle, which accepts either a quick-release hook or the strap itself. Either option ensures that the strap will cross the shoulder at the optimal ergonomic angle to provide excellent comfort and stability.

Insertrolley

Revolutionary Modular Trolley System with extendable wheels to better stabilize large cases (Patent Pend), page 52.

EPH

The Ergonomic Photo System is a modular system that allows you to attach 1-3 KATA cases together, page 26.

PROTECTING SOLUTIONS

PROTECTION & LIGHT-WEIGHT PERFECTLY BALANCED

Our mission is to provide the maximum protection with the most ergonomic, lightweight design possible. We want our products to work with you and help you do your job in the best possible way.

TST

TST - Thermo-Shield-Technology provides state-of-the-art protection for digital equipment while creating an extremely light product.

1. Thermo-formed "rib-shape" construction (Patent Pend.)
2. Mil-Std water, dust and abrasion resistant Super Nylon®.
3. Shock protective insulated Cross-linked, closed cell PE+EVA shield.
4. Vibration reducing Air-PU for internal padding and cushioning.
5. Anti-scratch Yelloop® lining enables divider attachment, and location of small objects in poor lighting conditions.

Six Layers of Protection

We surround your equipment with the most protection possible, while still maintaining a lightweight design.

1. Polyester 600D
2. High-Density Polyethylene Foam
3. Aluminum Stave
4. Polypropylene Panel
5. Soft Polyurethane Foam
6. Cordura® 1000

Toblerone

Made from synthetic thermo-rubber, this uniquely designed feature absorbs shocks and protects the case from abrasion, dirt, mud and standing water.

Modi-Vers System

Kata products feature 'Yelloop' Hook & Loop interiors with included dividers or Modi-Vers strips that allow you to create compartments inside the cases to meet your exact set up and protection requirements. You can easily cut and configure the size and shape of the dividers. No glue, knives or special skills needed.

Element Protection

Camera Gloves, Guards and Rain Covers

KATA's Camera Gloves, DV/HDV Guards and Rain Covers provide you with every day protection of your gear no matter what climate or working conditions you may find yourself in.

KATA gloves are made of a specially engineered lamination:

1. External layer of nylon elastic knit, non-abrasive to your skin.
2. Middle layer of shock resistant, advanced closed cell foam prevents overheating of your camera.
3. Internal knit layer protects the camera body.

This non-fray lamination enables you to cut additional slots to fit your exact working configuration.

Reversible Elements Cover

An emergency reversible Elements Cover is included in many of our products to protect your case and equipment in inclement weather: black side out in rain or snow, and in sun reverse to silver for heat reflection.
